# Welcome

## Dear Colleagues:

Welcome to the **26<sup>th</sup> Annual Meeting of the North American Skull Base Society** at the Fairmont Scottsdale Princess in Scottsdale, AZ.

This year's pre-meeting practical course is organized by Devyani Lal and Bernard Bendok from the Mayo Clinic in Scottsdale and will be held at the nearby Mayo Clinic Building and state-of-the-art Center for Procedural Innovation. This year's course has something for everyone and will offer two tracks for participation (prosection/dissection and prosection/surgical simulation). The prosection/dissection track will address the optimal surgical approach and will contrast transcranial and endoscopic approaches. For the first time, there will be myriad opportunities to gain hands-on experience with surgical tools and products using surgical simulation exercises in the prosection/surgical simulation track. Additionally, the lectures and prosections will be offered as a webcast to an international audience.

The theme of this year's meeting is, "Innovation & Creativity in Skull Base Surgery." Surgical innovation is driven by technological advancement and the creativity of the surgeon. The Program Committee, chaired by James Liu (Rutgers) and Allan Vesca (University of Toronto) has worked hard to develop a program that offers innovative content in an innovative format. The program will include Master Surgeon classes highlighting the surgical techniques of master surgeons, expert panel sessions integrated with proffered papers, fast-paced PechaKucha sessions, Brainstorming sessions, Video Coaching, and other surprises. We anticipate a very competitive field for the best manuscript by a fellow, resident or medical student. The top three winners will be presented at a plenary session.

In keeping with the theme of this year's meeting, we have three innovative and exciting keynote speakers that demonstrate the importance of creative thinking in addressing different types of challenges: the future of robotic technology (Eric Meyhofer, leader of Uber's *Advanced Technologies Center*), the conquest of extreme environments (Alison Levine; completed Adventure Grand Slam; author of *On The Edge: The Art of High-Impact Leadership*), and solving social problems (Bill Strickland; CEO, social architect, community leader, visionary; author of *Make the Impossible Possible*). Each speaker will provide a unique perspective on the importance of teamwork and problem-solving in challenging situations.

We are honored to have faculty delegations from the European Skull Base Society (President: Robert Behr from Germany) and the World Federation of Skull Base Societies (President: Kenji Ohata from Japan) participating in the program. There will also be joint sessions with the American Rhinologic Society (President: Peter Hwang).

Working behind the scenes, the NASBS committees and several task forces are addressing research priorities, billing and coding questions, and working hard to increase value for NASBS members. The Membership Committee (chaired by James Evans) continues to add new members to our ranks and maintain the diversity of our membership. The Coding & Billing Task Force (led by Adam Folbe) is working in conjunction with Zupko & Associates to develop NASBS guidelines for proper billing and coding of endoscopic procedures. The History Committee will utilize the Annual Meeting to capture an oral history of skull base surgery from early pioneers and past presidents of the society.

In recognition of the global community of skull base surgery, we look forward to starting the Annual Meeting with a social event for international attendees on Thursday evening. The Welcome Reception for all attendees will be on Friday evening with a special reception held on Saturday for all new members. The social event on Saturday evening will highlight the local culture of the southwest so bring your cowboy (or cowgirl) attire.

Enjoy your time in Scottsdale!

Carl Snyderman, MD, MBA  
President, North American Skull Base Society

## ANNUAL MEETING OBJECTIVES

At the conclusion of this activity, participants should be able to:

- Explain most recent recommendations for management of skull base pathology.
- Describe recent advances in instrumentation and technology in skull base surgery.
- Gain knowledge in challenging skull base pathology from experienced leaders in the field.
- Collaborate in multidisciplinary working groups to identify state-of-the-art management for select skull base pathology.
- Gain knowledge on optimal surgical technique through video analysis and expert critique of intraoperative videos.
- Establish concise statements on management of complex skull base pathology through review of existing medical literature.

## WHO SHOULD ATTEND

The NASBS meeting is open to NASBS members and non-members.

## TARGET AUDIENCE

- Head and neck surgeons, neurosurgeons, reconstructive surgeons, radiotherapists, radiologists, medical oncologists, physical rehabilitation physicians, ophthalmologists, neurologists, maxillofacial surgeons, maxillofacial prosthodontists and endocrinologists.
- Targeted allied health professionals will include physical therapists, oncology nurses, oral health specialists, occupational therapists, speech and language pathologists, optometrists, psychologists and anaplasologists.

### CONTINUING MEDICAL EDUCATION CREDIT INFORMATION

#### Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of the American College of Surgeons and the North American Skull Base Society. The American College of Surgeons is accredited by the ACCME to provide continuing medical education for physicians.

#### AMA PRA Category 1 Credits™

The American College of Surgeons designates this live activity for a maximum of 20.25 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

## MEMBERSHIP BENEFITS

- **Scientific Journal:** Members will receive the official journal of the society, *The Journal of Neurological Surgery Part B*, a bimonthly publication that contains peer reviewed original articles, review articles, and position papers. It also presents news and information on an international scope to keep members aware of recent and upcoming events, activities, and evolving developments in skull base surgery.
- **Continuing Medical Education:** Members will receive listings of continuing medical education opportunities in skull base surgery, as well as scientific courses sponsored by the NASBS and will receive reduced registration fees for national scientific meetings.
- **Membership Directory:** Online access to all members contact information.
- **NASBS Website Access:** Members will have access to Member-Only discussion areas on the Society's website.

Please visit [www.nasbs.org/about/membershipinfo.php](http://www.nasbs.org/about/membershipinfo.php) for more information or email [membership@nasbs.org](mailto:membership@nasbs.org).

## WHY JOIN NASBS?

Membership is based on an interest in skull base surgery and related sciences. Individuals with backgrounds in neurosurgery, otolaryngology-head and neck surgery, radiology, neuroradiology, otology, neurotology, plastic and reconstructive surgery, and others interested in skull base diseases are welcome to apply.

## ERIC MEYHOFER

Uber Advance Technology Center

**Friday, February 12, 8:30 am – 9:30 am**

After Mechanical Engineering undergraduate studies at Carnegie Mellon University, Eric's primary focus became designing high performance robotics in Silicon Valley. Some of his previous work designing complex semiconductor handling robots resulted in multiple US patents for laser mapping. In 2004 Eric accepted a Faculty position at Carnegie Mellon's National Robotics Engineering Center. At the NREC he led the design and assembly of 'Crusher', an autonomous multi-million dollar ground combat vehicle. This vehicle's several thousand parts were successfully assembled and tested in only 10 weeks. At NREC Eric was also the Co-PI of the Automated Coating Removal System for the Air-Force. For this project he headed up the design and build of an autonomous robot that can stretch 40ft high, is omni-directional in motion, and has 10ft of reach. This robot has a 6kW laser at its end-effector and autonomously removes paint from fighter jets. Additionally Eric was the Co-PI on a wearable medical devices project that focused on improving the ECG process by incorporating Artificial Intelligence software in the data interpretation stage. In January 2015, after over a decade with CMU, Eric left the University and joined Uber to help create the Uber Advanced Technologies Center based in Pittsburgh Pa. Known as the UATC, this center is focusing on advanced safety, mapping, and autonomous technologies.

## ALISON LEVINE

Team Captain of the First American Women's Everest Expedition & Author of the *New York Times* Bestseller *On the Edge: The Art of High-Impact Leadership*

**Saturday, February 13, 8:30 am – 9:30 am**

Levine, a world-renowned adventurer, shares lessons learned from various extreme environments—ranging from Mt Everest to the South Pole—and explains how they apply to business and beyond.

Her advice is flat-out contrarian and flies in the face of what you've been told by well-known management gurus and highly-paid executive coaches: encourage big egos, go backward – away from your goal, ignore the rules, ditch the plan, deprive yourself of sleep, and reward failure. But it works for her, and it can work for you too.

She provides a roadmap to help you scale whatever big peaks you aspire to climb—be they literal or figurative—by offering practical, humorous, and often unorthodox advice about how to reach your potential as a leader.

Levine served as the team captain of the first American Women's Everest Expedition, scaled the highest peak on every continent, and skied to both the North and South Poles—an accomplishment known as the Adventure Grand Slam, which fewer than forty people in the world have achieved.

*"Standing on top of a mountain isn't important; it's about the journey...and the lessons you learn along the way."* – Alison Levine

Levine spent four years as an adjunct professor at the United States Military Academy at West Point in the Department of Behavioral Sciences & Leadership. She is an advisor to the Thayer Leader Development Group at West Point and is on the board of the Coach K Center on Leadership and Ethics at Duke University. She is the founder of the Climb High Foundation, which trains jobless women in western Uganda to work as trekking guides in the Rwenzori Mountains. She is one of few who have presented at the World Economic Forum in Switzerland. Her best-selling book, *On the Edge: The Art of High Impact Leadership*, was released in January of 2014.

## Open and Endoscopic Skull Base Surgery

**February 10-11, 2016 • Mayo Clinic, Scottsdale, Arizona**

Mayo Clinic Building on the Shea Campus & Collaborative Research Building, Scottsdale, AZ

COURSE DIRECTORS: Devyani Lal, MD & Bernard Bendok, MD, Mayo Clinic, Scottsdale, AZ

**The pre-meeting dissection workshop of the 26<sup>th</sup> Annual NASBS Meeting** offers participants with choices between hands-on cadaver dissection sessions, lecture sessions with hands-on exercises and web-based learning. Modules will take participants through open and endoscopic exercises to the central, lateral and posterior skull base.

At the conclusion of this session, participants will be able to:

1. Demonstrate knowledge of decision making for Rx of skull base lesions.
2. Apply open and endoscopic surgical techniques in the Rx of skull base tumors.
3. Understand the nuances of vascular anatomosis.
4. Explain various ways of reconstruction of the skull base to avoid complications.

## SHUTTLES

### **MASTER SURGEON 1: Approaches to the Cavernous Sinus**

Palomino 8

MODERATOR: Juan Fernandez-Miranda, MD

SPEAKERS: William Couldwell, MD, PhD; Ali Krisht, MD; Harry van Loveren, MD

*The North American Skull Base Society gratefully acknowledges an unrestricted educational grant from Zimmer Biomet in support of this session.*

- The Art of Mobilizing The Walls of the Cavernous Sinus – *Harry van Loveren, MD*
- How to Achieve Successful Surgery in the Cavernous Sinus – *Ali Krisht, MD*
- Endoscopic Endonasal Intracavernous Surgery – *Juan Fernandez-Miranda, MD*
- Cavernous Sinus Exenteration / En-Bloc Resection – *William Couldwell, MD, PhD*

This session will cover different surgical techniques and approaches to the cavernous sinus, including mobilization of the cavernous sinus walls, transcranial intracavernous routes, endoscopic endonasal intracavernous surgery, and cavernous sinus exenteration.

At the conclusion of this session, participants will be able to:

1. Identify different surgical approaches to the cavernous sinus including en-bloc removal of the cavernous sinus.
2. Distinguish transcranial approaches to the walls of the cavernous sinus from true intracavernous sinus surgery.
3. Integrate endoscopic endonasal approaches to the cavernous sinus into the surgeon's armamentarium.

### **MASTER SURGEON 2: Jugular Foramen Tumors and Paragangliomas**

- Jugular Foramen Tumours - The Otologists Perspective – *Michael Gleeson, MD*
- Case Discussion – *Michael Gleeson, MD*

The speakers at this session will address the expanding need for multi-disciplinary management of patients with paragangliomas that has become necessary in the light of advances in molecular medicine. Indications and contra-indications for active management will be discussed together with common pitfalls and their avoidance. This session will appeal to all lateral skull base and posterior fossa surgeons.

At the conclusion of this session, participants will be able to:

1. Formulate an appropriate management.
2. Recognize the importance of an integrated team of clinicians.
3. Appraise and prioritize the needs of patients with jugular foramen tumors.

- Anterior Clinoidal Meningiomas: Complications and Lessons Learned – *Chandranath Sen, MD*
- Tuberculum Meningioma Surgery Complications: Case Presentations and Discussion – *Michael McDermott, MD*

Using extensive case discussions, the surgeons will discuss the challenges of treating meningiomas in different areas of the skull base (anterior clinoid, tuberculum, and petroclival region), with an emphasis on avoiding complications.

At the conclusion of this session, participants will be able to:

1. Discuss criteria for choosing a particular surgical approach.
2. Recall major complications of each approach.
3. Develop treatment algorithms for meningiomas of the skull base.

- Intradural Tumors Beyond the Sella – *Daniel Prevedello, MD*
- Reconstruction Beyond Sellar Defects – *Vijay Anand, MD*
- Addressing Complications in ExtraSellar Skull Base Surgery – *Paul Gardner, MD*

This session provide the advanced skull base surgeon tips and pearls related to approach, resections and reconstruction of intradural skull base tumor dissections beyond the pituitary.

At the conclusion of this session, participants will be able to:

1. Understand the risk of more advance skull base surgery.
2. Know that vascular flaps make the most difference in outcomes here compared with pituitary surgery.
3. Employ approaches to minimize complications during the learning curve.

## 11:00 am – 12:00 pm PANEL DISCUSSIONS

### PANEL DISCUSSION 1: Controversies in the Management of Sinonasal Malignancy

*Palomino 8*

MODERATOR: Eric Wang, MD

SPEAKERS: Roy Casiano, MD; Ziv Gil, MD, PhD; James Palmer, MD

- Staging and Management of the Neck in Sinonasal Malignancies – *Ziv Gil, MD, PhD*
- Extent of Resection: When to Perform a Unilateral v. Bilateral v. No Skull Base Resection – *Roy Casiano, MD*
- Postoperative Care - Short and Long Term Issues of Surveillance and Collateral Damage – *James Palmer, MD*
- Selecting Treatment Strategies for Sinonasal Malignancies: The Effect of Pathology, Tumor Extension, Prior Interventions and Comorbidities – *Eric Wang, MD*

This panel will address controversial topics in the current management of sinonasal malignancies for skull base surgeons. Topics addressed will include patient selection, staging and management of the neck, extent of resection and postoperative care.

At the conclusion of this session, participants will be able to:

1. Compare treatment options for sinonasal malignancy based upon tumor type and extent of disease.
2. Assess and manage neck disease in sinonasal cancer.
3. Choose appropriate degrees of surgical resection.
4. Articulate appropriate post-operative surveillance and management of these patients.

## **PANEL DISCUSSION 2: Treatment Options for Chordomas**

*Palomino 9*

MODERATOR: Zachary Litvack, MD

SPEAKERS: Sebastien Froelich, MD; Norbert Liebsch, MD; Lalgam Sekhar, MD

- Role of Complete vs. Palliative Resection for Craniocervical Chordoma – *Lalgam Sekhar, MD*
- Endoscopic Resection of Craniocervical Chordoma – *Sebastien Froelich, MD*
- State of the Art - Surgical Resection and Radiation Therapy of Craniocervical Chordoma – *Norbert Liebsch, MD*
- Difficult Case Review - Panel Debate on Management of Chordoma – *Zachary Litvack, MD & Panelists*

Despite advances in surgical and radiation therapy techniques, chordoma of the cranio-cervical junction remains a difficult lesion to manage due to its locally invasive nature and high incidence of recurrence. This session focuses on a multi-modal approach to management of these lesions, combining the best of open and endoscopic resection with the newest radiation therapy modalities. We encourage surgeons and radiation-oncologists to attend this session, and bring their difficult cases for roundtable discussion.

At the conclusion of this session, participants will be able to:

1. Demonstrate knowledge of the management options for treatment of chordoma.
2. Formulate a multi-modal surgical and radiation treatment plan for chordoma.
3. Recognize cases that may not benefit from certain surgical approaches.

## **PANEL DISCUSSION 3: Optimal Treatment of Acoustic Neuroma**

*Palomino 10*

MODERATOR: Pamela Roehm, MD, PhD

SPEAKERS: James Boggan, MD; Pamela Roehm, MD, PhD; Marc S. Schwartz, MD

- Overview of Vestibular Schwannoma – *Pamela Roehm, MD, PhD*
- Optimizing Surgery for Vestibular Schwannoma – *Marc S. Schwartz, MD*
- Stereotactic Radiotherapy for Vestibular Schwannoma – *James Boggan, MD*
- Post-treatment Rehabilitation after Vestibular Schwannoma – *Pamela Roehm, MD, PhD*

This panel will discuss current treatment options for acoustic neuroma including observation with serial imaging, microsurgical resection, and stereotactic radiotherapy. Physicians who treat patients with acoustic neuroma should attend.

At the conclusion of this session, participants will be able to:

1. Convey the natural history of untreated vestibular schwannoma.
2. Differentiate the various surgical approaches.
3. Identify those patients who would benefit from stereotactic radiotherapy.
4. Manage post-treatment rehabilitation.

## **PANEL DISCUSSION 4: Management of Vascular Issues in Skull Base Surgery**

*Moor 2*

MODERATOR: Amir Dehdashti, MD

SPEAKERS: Mustafa Baskaya, MD; Hiroyuki Kinouchai, MD, PhD; Harry van Loveren, MD

- Dealing with Vascular Injuries in Daily Skull Base Practice: Micro-Suturing – *Mustafa Baskaya, MD*
- Talk TBD – *Harry van Loveren, MD*
- The Role of Neuroendoscope Integrated with Fluorescence Vide Angiography in the Aneurysmal Surgery – *Hiroyuki Kinouchai, MD, PhD*
- Interactive Case Discussion – *Amir Dehdashti, MD*

Discussion of management of vascular injuries during skull base surgery and tips and techniques to improve visualization and avoidance. Neurosurgeons and ENT, residents and fellows are welcome.

At the conclusion of this session, participants will be able to:

1. Discuss the management of vascular injuries during skull base surgery.
2. Use tips and techniques to improve visualization and avoidance.

### PANEL DISCUSSION 5: Debate – Endoscopic vs. Transcranial Approaches for Meningiomas

Palomino 8

MODERATOR: James Evans, MD

SPEAKERS: Fred Gentili, MD, MSc; Juan Gomez-Amador, MD; James Liu, MD

*The North American Skull Base Society gratefully acknowledges an unrestricted educational grant from Stryker in support of this session.*

- Transcranial management of anterior cranial base meningiomas – *James Liu, MD*
- Indications and limitations of endonasal resection of anterior cranial base meningiomas – *Juan Gomez-Amador, MD*
- Endoscopic “versus” transcranial resection of anterior cranial base meningiomas – *Fred Gentili, MD, MSc*

This session is designed to help neurosurgeons, otolaryngologists, and ophthalmologists better understand the indications, techniques, and limitations for endoscopic versus transcranial resection of meningiomas.

At the conclusion of this session, participants will be able to:

1. Describe the indications and limitations for endonasal resection of anterior cranial base meningiomas.
2. Describe the indications and limitations of transcranial resection of anterior cranial base meningiomas.
3. Understand potential complications of endonasal resection of meningiomas.

### PANEL DISCUSSION 6: Tumor Board - Pediatric Skull Base Tumors

Palomino 9

MODERATOR: Elizabeth Tyler-Kabara, MD, PhD

SPEAKERS: Jeffrey Rastatter, MD; Jay Storm, MD; Scott Wait, MD

- Craniopharyngiomas including Keyhole and Transventricular Approaches – *Scott Wait, MD*
- Other Peds Cases – *Jeffrey Rastatter, MD*
- Brainstem Cases: Endonasal and Keyhole Approaches – *Jay Storm, MD*

This session will provide an overview of pediatric skull base (endonasal, keyhole and endoscopic assisted) procedures with an emphasis on the differences between adult and pediatric patients. This will include discussion of the different anatomy, surgical strategies, pathologies, and complications.

At the conclusion of this session, participants will be able to:

1. Understanding of patient selection for pediatric skull base surgery.
2. Understanding of the differences in anatomy between pediatric and adult cases.
3. Understanding of the unique complications and surgical strategies in the pediatric population.

## **PANEL DISCUSSION 7: Cranial Nerve Injury: Prevention and Management**

*Palomino 10*

MODERATOR: Michael Link, MD

SPEAKERS: Samuel Barnett, MD & Richard Hayden, MD, MSc

- Introduction – *Michael Link, MD*
- Management of Dysphagia and Dysphonia Secondary to Lower Cranial Nerve Deficits – *Speaker TBD*
- Rehabilitation and Treatment of Facial Weakness – *Samuel Barnett, MD*
- Hearing Rehabilitation Options for Unilateral Hearing Loss and Deafness – *Richard Hayden, MD, MSc*
- Rehabilitation of Diplopia – *Michael Link, MD*
- Question and Comments – *Michael Link, MD*

This session is for practitioners who treat and care for patients with skull base pathology who might incur cranial nerve deficits either due to the course of their disease, or treatment of the disease. This session will focus on the rehabilitation of cranial nerve deficits. Lectures will cover the treatment of cranial neuropathy induced diplopia, facial weakness, hearing loss and dysphagia and dysphonia. Experts will discuss state of the art techniques to rehabilitate cranial nerve deficits to optimize function and try and restore quality of life to patients suffering with cranial nerve disorders secondary to skull base pathology.

At the conclusion of this session, participants will be able to:

1. Demonstrate knowledge about how various cranial nerve deficits affect patient's quality of life.
2. Manage cranial nerve deficits to optimize function.
3. Choose the best rehabilitation option for individual patients to help satisfy objective 2.

## **PANEL DISCUSSION 8: Orbital Tumors and Approaches**

*Moor 2*

MODERATOR: S. Tonya Stefko, MD

SPEAKERS: Khaled Aziz, MD; Ben Bleier, MD; Kris Moe, MD

- Introduction – *S. Tonya Stefko, MD*
- Endoscopic Resection of Intra- and Extraconal Masses – *Ben Bleier, MD*
- Endoscopic Orbital and Transorbital Approaches – *Kris Moe, MD*
- Eyelid Crease Approaches for Anterior Skull Base Tumors – *Khaled Aziz, MD*
- Brief Case Presentations with Audience Participation – *All*

Surgeons interested in 1.) treatment of primary and secondary orbital tumors, and 2.) approaching the intracranial space via the orbit should attend this session.

At the conclusion of this session, participants will be able to:

1. List the most common primary and secondary orbital tumors.
2. Plan surgical vs. observation vs. other treatments.

MODERATOR: Siviero Agazzi, MD, MBA

SPEAKERS: Rick Friedman, MD, PhD; John Golfinos, MD; Michihiro Kohno, MD

- Reading the MRI to Understand Your Chances of Saving Hearing and the Facial Nerve – *John Golfinos, MD*
- Intra-Operative Continuous Monitoring of Evoked Facial Nerve Electromyogram in Large Acoustic Neuroma Surgery – *Michihiro Kohno, MD*
- Nuances of Hearing Preservation in the Middle Fossa Approach to Acoustic Neuromas – *Rick Friedman, MD, PhD*

This session will provide a detailed and focused insight into strategies to achieve best surgical results in acoustic tumor resection. Three experts with extensive experience in acoustic neuroma surgery will review the pre-operative, intra-operative and approach related nuances for an optimal patient outcome. Although the session will be geared towards experienced skull base surgeons, younger neurosurgeons will benefit the most from the interactive discussion and case presentation.

At the conclusion of this session, participants will be able to:

1. Organize their evaluation of pre-operative MRI for acoustic neuroma surgery.
2. Differentiate the different modalities of facial nerve monitoring in acoustic neuroma surgery.
3. Develop a detailed strategy for a successful middle fossa approach to acoustic neuroma surgery.

As you know with the evolution and increasing adoption of endoscopic approaches the role of transfacial approaches is being re-evaluated. Transfacial approaches are still the procedure of choice for certain groups of patients.

At the conclusion of this session, participants will be able to:

1. Recognize different transfacial approaches for skull base surgery for certain patients.

- Limitations of Endonasal Surgery – *John Jane, MD*
- Discussion and Q&A

Experienced pituitary surgeons will share with attendees strategies for avoiding complications, maximizing tumor extent of resection, and preserving gland function and quality of life. This session is appropriate for neurosurgeons and otolaryngologists.

At the conclusion of this session, participants will be able to:

1. Describe methods to preserve pituitary gland function following surgery.
2. Describe techniques to avoid complications.

- Craniopharyngiomas – *Fred Gentili, MD, MSc*
- Meningioma – *Carl Heilman, MD*
- Treatment at Progressions – *Jacques Morcos, MD*

In this session we will discuss the clinical nuances of treating skull base tumors that either at presentation or recurrence are best treated with less than a gross total resection. We will assess other treatment strategies, including adjuvant radiation therapy and chemotherapy.

At the conclusion of this session, participants will be able to:

1. Identify the pathologies that are best suitable for hybrid treatment modalities.
2. Recognize the limitations of primary surgical treatment of skull base tumor.
3. Formulate a multi-modality treatment plan for skull base tumors.

### **PANEL DISCUSSION 10: Sellar/Parasellar Tumors**

- Interactive Case Discussion – *Amir Dehdashti, MD*

In this session approaches to sella/parasellar tumors and discussion of risk factors for recurrence will be discussed. Neurosurgeons, ENT, endocrinologists, residents and fellows would benefit from this session.

At the conclusion of this session, participants will be able to:

1. Discuss different treatment options for seller/parasellar tumors and discuss the risk factors for recurrence.

- What Metrics Should be Used to Judge a COE? – *Daniel Nuss, MD*
- Panel Discussion

This session will discuss the concept of Centers of Excellence (COE) for skull base surgery and whether they are of value. We will explore the basic structure of a COE, the evidence for improved outcomes with higher case volumes and the metrics that we should consider using to evaluate the success of a COE. Presentations on these topics will be followed by a panel discussion with interactive audience participation.

At the conclusion of this session, participants will be able to:

1. To illustrate the basic structure and function of a COE.
2. To evaluate the evidence that COEs provide better quality care.
3. To prioritize the metrics a COE should be evaluated on.

Intracranial hypertension is now recognized as the major contributor to the development of spontaneous CSF leaks and can cause significant detriment to the integrity of a skull base reconstruction. This session should be attended by practitioners with an interest in the latest management strategies and imaging modalities for CSF leaks associated with intracranial hypertension.

At the conclusion of this session, participants will be able to:

1. Apply the latest imaging techniques for diagnosis and management of intracranial hypertension and spontaneous CSF leaks.
2. Select appropriate medical and surgical treatments for patients with increased intracranial pressure.
3. Employ comprehensive coordinated care for the patient with CSF leaks due to intracranial hypertension.

This session will review some common and important adverse outcomes which can occur following radiation therapy for skull base pathology. Highlights will include a review of acute toxicities in proton beam radiation therapy, radiation induced neoplasms and complications specific to the treatment of intracranial meningiomas. This session is geared towards surgeons and other practitioners involved in the management of skull base tumours.

At the conclusion of this session, participants will be able to:

1. Evaluate the risk of complications following stereotactic radiosurgery for intracranial meningiomas.
2. Articulate the risk of radiation induced neoplasm following radiation therapy for skull base tumours.
3. Recognize the specific acute and delayed adverse effects of proton beam radiation therapy in contrast to photon based radiation therapy.

MODERATOR: Tom Roland, MD

SPEAKERS: Mario Ammirati, MD; Giovanni Danesi, MD; John Leonetti, MD

- Tumor Board – *Tom Roland, MD and all Panelists*

This session will be conducted in the manner of a regular tumor board that one might have at their institution or hospital. Approximately 6 cases will be presented with each case bringing to light an important concept or controversial management dilemma. The cases will include facial nerve tumors, glomus tumors, inflammatory tumors and unusual tumors. Discussion will be center around tumor control, facial nerve function, hearing and lower cranial nerve function. The panelists will be asked to comment as the cases are being presented. A final management plan will be developed based on the feedback. Some time will be left for audience questions or comments.

At the conclusion of this session, participants will be able to:

1. Distinguish management options for complex temporal bone tumors.
2. Illustrate management options for hearing loss and facial nerve injury with complex temporal bone tumors.
3. Organize a thoughtful management plan for patients with complex temporal bone tumors considering all treatment options.

**PANEL DISCUSSION 15: Controversies in the Management of Craniopharyngioma***Palomino 10*

MODERATOR: Maria Koutourousiou, MD

SPEAKERS: Fred Barker, MD; Fred Boop, MD; Kenji Ohata, MD

- Introduction – *Maria Koutourousiou, MD*
- Radical Resection of Craniopharyngiomas: Endoscopic Endonasal and Transcranial Approaches – *Kenji Ohata, MD*
- Partial Surgical Resection plus Focal Radiation in Pediatric Craniopharyngiomas - *Fred Boop, MD*
- Adjuvant Treatment of Craniopharyngiomas: Updates on the Medical Management of Craniopharyngiomas and Trial Design – *Fred Barker, MD*
- Question & Answers
- Case Presentations

Discuss the challenge in the management of craniopharyngiomas and explain the necessity of multimodality treatment. Describe treatment options with updates on new techniques and approaches that should be tailored to individuals. To be attended by Neurosurgeons, ENTs.

At the conclusion of this session, participants will be able to:

1. Compare the benefits and limitations of radical lesion resection vs. partial resection with adjuvant treatment.
2. Distinguish treatment challenges of pediatric from adult craniopharyngiomas.
3. Understand the updates on the medical management of craniopharyngiomas.

## **PANEL DISCUSSION 16: Controversies in Petroclival Tumors**

*Moor 2*

MODERATOR: Bharat Guthikonda, MD

SPEAKERS: Eiji Kohmura, MD, PhD; Diego Mendez-Rosito, MD; A. Samy Youssef, MD

- Introduction – *Bharat Guthikonda, MD*
- Talk TBD – *Eiji Kohmura, MD*
- Discussion of Various Approaches According to Tumor Pathology in the Petroclival Region – *Diego Mendez-Rosito, MD*
- Talk TBD – *A. Samy Youssef, MD*

During this session surgical approaches for various petroclival tumoral pathologies will be discussed. Personal experiences concerning the management of petroclival tumors will be shared and discussed.

At the conclusion of this session, participants will be able to:

1. Compare different surgical approaches for distinct petroclival tumors.
2. Discuss surgical approaches according to the pathology of tumors in the petroclival region.
3. Illustrate distinct surgical corridors according to the tumor location.

## **PANEL DISCUSSION 17: Systematic Review of Sinonasal Malignancy/Best Treatment/Pre-Operative Chemo/Radiation**

*Palomino 8*

MODERATOR: Jean Anderson Eloy, MD

SPEAKERS: Ricardo Carrau, MD; Peter Hwang, MD; Derrick Lin, MD

Sinonasal malignancies are rare and vary in behavior according to histology and anatomical location. Survival and optimal treatment for these lesions are thus uncertain in various cases. In this panel, international experts on sinonasal malignancies will discuss the optimal management for these lesions, and discuss survival rates based on anatomical site, patient demographics, and treatment modalities. Experts' advice on difficult cases will be presented.

At the conclusion of this session, participants will be able to:

1. Select the appropriate surgical approach (endoscopic transnasal, open transcranial, or combined endoscopic transnasal and open transcranial) for resection of sinonasal malignancies.
2. Learn the nuances in endoscopic endonasal resection of sinonasal malignancies.
3. Recognized which cases of sinonasal malignancies necessitate chemotherapy and radiotherapy as the primary treatment modality or adjuvant treatment.

- Panel Discussion: Unusual Clival Neoplasms and Their Management

This session is designed to cover surgical approaches for clival neoplasms and help the participant understand the variety of pathologies and approaches, the advantages and limitations of anterior approaches and how these approaches compliment each other and fit into the armamentarium of skull base approaches.

At the conclusion of this session, participants will be able to:

1. To understand the evolution of approaches to the clivus and how/when these approaches can be applied.
2. Understand the role of the transoral approach for clival lesions.
3. Review the challenges of clival reconstruction and vascularized options.

## **PANEL DISCUSSION 19: Skull Base Economics**

*Palomino 10*

MODERATOR: Adam Folbe, MD

SPEAKERS: John Golfinos, MD; Kim Pollock; Carl Snyderman, MD, MBA

- Introduction – *Adam Folbe, MD*
- Case Scenarios and Examples – *Carl Snyderman, MD, MBA*
- Case Scenarios and Examples – *John Golfinos, MD*
- Present Consensus Statement and Recommended Codes – *Kim Pollock*

This session will review current coding practices among skull base surgeons when performing combined cases, and provide updated “best coding” recommendations. The discussion will be aimed towards practicing Neurosurgeons and Otolaryngologists who perform combined surgeries.

At the conclusion of this session, participants will be able to:

1. Employ proper billing strategies for endoscopic skull base surgery.
2. Use the consensus statement to justify charges to insurance companies.
3. Implement billing strategies for endoscopic skull base surgeries.

## **PANEL DISCUSSION 20: Controversies in the Management of Trigeminal Schwannomas**

*Moor 2*

MODERATOR: Michael Chicoine, MD

SPEAKERS: Juan Barges-Coll, MD; Samuel Barnett, MD; Masahiro Toda, MD, PhD

- Introduction – *Michael Chicoine, MD*
- Transcranial Approaches – *Mashahiro Toda, MD, PhD*
- Endonasal Endoscopic Approaches – *Juan Barges-Coll, MD*
- Radiosurgical Options – *Samuel Barnett, MD*
- Questions & Answers, Overview - Panel Discussion of Cases – *All Speakers*

Current treatment options including transcranial approaches, endonasal endoscopic approaches, and radiosurgical techniques for the management of trigeminal schwannomas will be reviewed. Neurosurgeons, otolaryngologists, radiation oncologists, and other clinicians involved in the care of patients with trigeminal schwannomas should attend.

At the conclusion of this session, participants will be able to:

1. To articulate the natural history and appropriate clinical and imaging evaluation for patients with trigeminal schwannomas.
2. To differentiate the appropriate surgical options including endoscopic and transcranial approaches for patients with trigeminal schwannomas.
3. Formulate appropriate strategies for the radiosurgical treatment of patients with trigeminal schwannomas.

10:00 am – 10:30 am **Refreshment Break in Exhibit Hall**

10:30 am – 11:15 am **KEYNOTE LECTURE: Make The Impossible Possible**

*Salon H&I*

INTRODUCTION: Carl Snyderman, MD, MBA

KEYNOTE SPEAKER: Bill Strickland, CEO of Manchester Bidwell Corporation, Social Architect, Community Leader, and Visionary

11:15 am – 12:15 pm **3D Video Techniques**

*Salon H&I*

MODERATOR: Juan Fernandez-Miranda, MD

SPEAKERS: Mustafa Baskaya, MD; William Couldwell, MD, PhD; James Liu, MD

This special 3D session will review relevant surgical anatomy and technical nuances for improving patient outcomes during complex skull base procedures. Detailed clinical cases will be presented by surgical masters using 3D high-definition surgical videos to maximize the learning experience for the viewers.

At the conclusion of this session, participants will be able to:

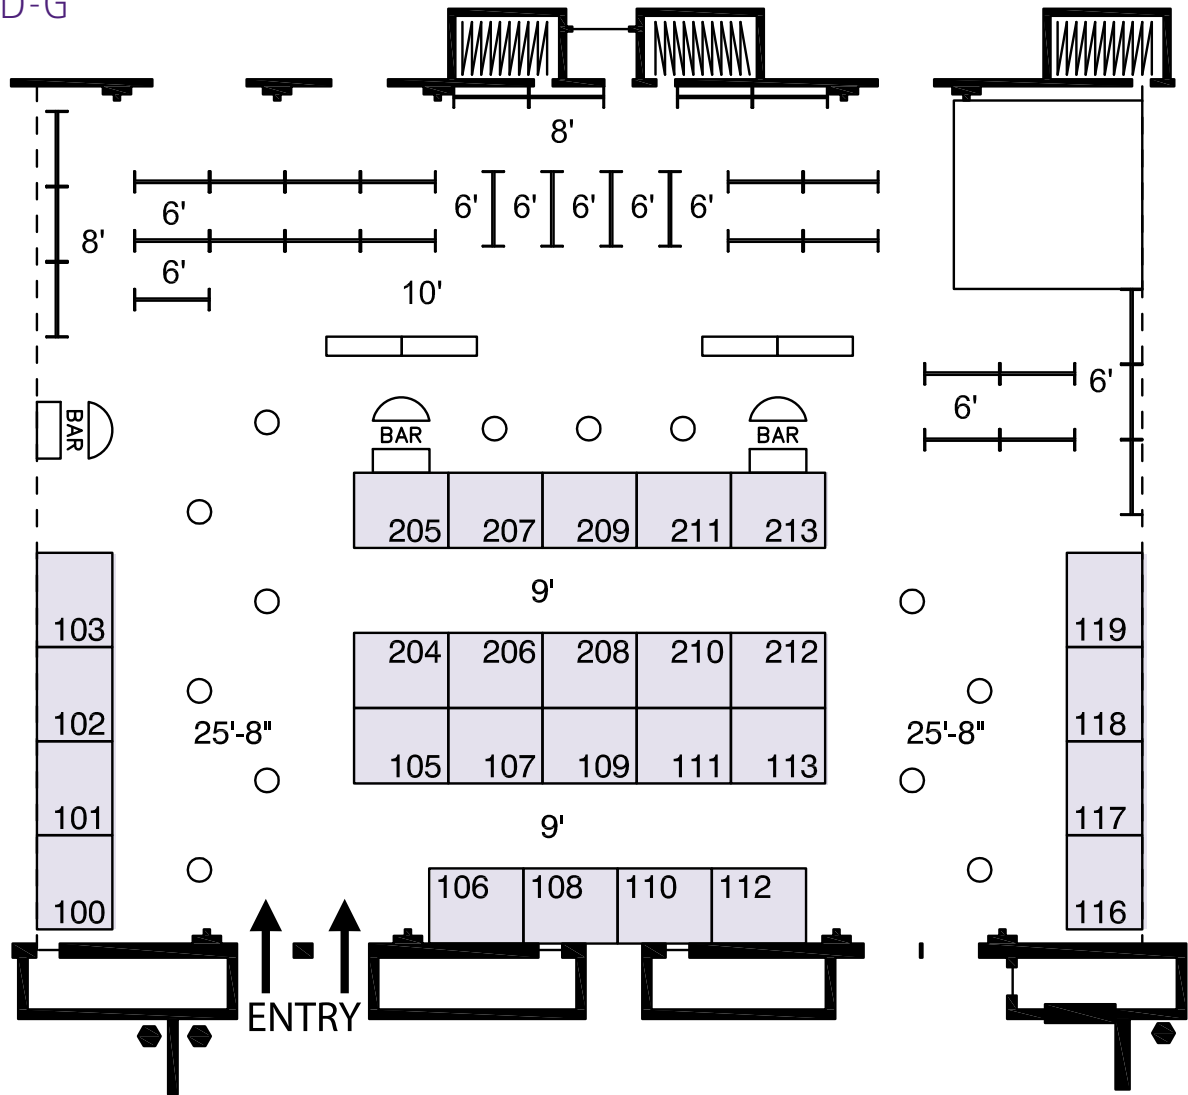

1. Outline general techniques and surgical approaches for complex skull base lesions.
2. Identify key anatomical landmarks for the performance of transcranial and endonasal skull base approaches to the anterior, middle, and posterior skull base.
3. Recognize operative nuances to advance patient safety.

12:15 pm – 12:30 pm **Closing Remarks**

**P098: CONTRALATERAL SEPTAL “TRAP DOOR” FLAP FOR UNILATERAL ANTERIOR SKULL BASE RECONSTRUCTION** – [Chester F Griffiths, MD](#), Bjorn Lobo, MD, Garni Barkhoudarian, MD, Kian Karimi, MD, Daniel F Kelly, MD; Pacific Brain Tumor Center John Wayne Cancer Institute

**P099: SURGICAL TECHNIQUE AND REPAIR OF LATERAL SPHENOID SINUS DEFECTS** – [Omar Akbik, MD](#), Andrew Carlson, MD, Jeremy Lewis; University of New Mexico

**P100: TOTAL NASAL RECONSTRUCTION USING A SPLIT CALVARIAL OSTEOPERICRANIAL FLAP** – Robert D Engle, MD<sup>1</sup>, Marcelo C Pereira, MD<sup>1</sup>, Karthik Shastri, MD<sup>1</sup>, Tyler J Kenning, MD<sup>2</sup>, [Carlos D Pinheiro-Neto, MD, PhD](#)<sup>1</sup>; <sup>1</sup>Division of Otolaryngology, Department of Surgery, Albany Medical Center, Albany, New York., <sup>2</sup>Department of Neurosurgery, Albany Medical Center, Albany, New York.

**P101: SINGLE STAGED RESECTIONS AND 3-D RECONSTRUCTIONS OF THE NASION/GLABELLA/ MEDIAL ORBITAL WALL/FRONTAL SINUS AND BONE : LONG-TERM OUTCOME AND REVIEW OF THE LITERATURE OREGON HEALTH AND SCIENCE UNIVERSITY; THE PERMANENTE MEDICAL GROUP** – [Jeremy N Ciporen, MD](#)<sup>1</sup>, Brandon Lucke-Wold<sup>2</sup>, Gustavo Mendez<sup>1</sup>, David J Cua, MD<sup>3</sup>, Anton Chen, MD<sup>3</sup>, Amit Banerjee, MD<sup>3</sup>, Paul T Akins, MD, PhD<sup>3</sup>, Ben Balough, MD, PhD<sup>3</sup>; <sup>1</sup>Oregon Health and Science University, <sup>2</sup>West Virginia University, <sup>3</sup>The Permanent Medical Group

**P102: ENDOSCOPIC NASOSEPTAL FLAP PRESERVATION APPROACHES TO THE CRANIAL BASE: AN UPDATE TO THE JEFFERSON APPROACH** – [David Hsu](#), Gurston Nyquist, MD, James J Evans, MD, Marc Rosen, MD, Kurren S Gill, BA, Mindy Rabinowitz, MD; Thomas Jefferson University

**P103: BIOCELLULOSE AS DURAL SUBSTITUTE IN SKULL BASE ENDOSCOPIC SURGERY AND RECONSTRUCTION** – [Danielle de Lara, MD](#), Leandro J Haas, MD, Celso I C Bernardes, MD, Vitor Hugo T Boer, MD, Luis R G O Mello, MD, PhD; Hospital Santa Isabel

**P104: GIANT CRANIOFACIAL OSTEOMA: PREOPERATIVE PLANNING AND STRATEGY OF SURGICAL EXCISION AND RECONSTRUCTION** - [Abdulrahman Albakr, Medical student](#), Sherif Elwatidy, Professor; King Saud University

**P105: FASCIA WITH BONE PATE RESURFACING TECHNIQUE IN REPAIRING SUPERIOR SEMICIRCULAR CANAL DEHISCENCE** – Brendan P O’Connell, [Jacob B Hunter](#), Kristen L Hovis, George B Wanna, David S Haynes; Vanderbilt University Medical Center

**P106: A MODIFICATION TO THE TRANSFACIAL APPROACH FOR LARGE MIDDLE CRANIAL BASE TUMORS: A TECHNICAL REPORT.** – [Philippe Lavigne, MD](#), Michel W Bojanowski, MD, François Lavigne, MD; CHUM, University of Montreal

**P107: BROAD MOBILIZATION OF THE INTERNAL CAROTID ARTERY IN FISCH TYPE B AND C APPROACHES** – Johana Diplan<sup>1</sup>, Josefina Morales<sup>1</sup>, Giovanni Danesi<sup>2</sup>, [C. Arturo Solares](#)<sup>1</sup>; <sup>1</sup>Georgia Regents University, <sup>2</sup>Ospedale Papa Giovanni XXIII

**P108: THE ROLE OF TRANSBASAL APPROACH FOR ANTERIOR SKULL BASE TUMORS WITH ACUTE VISUAL IMPAIRMENT** – [Koji Fujita, MD, PhD](#), Junya Fukai, MD, PhD, Hiroki Nishibayashi, MD, PhD, Naoyuki Nakao, MD, PhD; Department of Neurological Surgery, Wakayama Medical University

**P109: COMBINED APPROACH FOR EXCISION OF ADVANCED ANGIOFIBROMA: A STUDY OF 12 CASES** – [Fazal I Wahid, Senior Registrar](#); Medical Teaching Institute (MTI), Lady Reading Hospital (LRH), Peshawar-Pakistan

**P110: TITANIUM PLATE AS RECONSTRUCTIVE ADJUNCT FOR LARGE ANTERIOR CRANIAL BASE DEFECT** – [Amar Miglani, MD](#), Alepen B Patel, MD, Naresh Patel, MD, Devyani Lal, MD; Mayo Clinic, Arizona

**P111: USE OF SLEEVE NEURORRHAPHY AT THE BRAINSTEM FOR FACIAL NERVE RECONSTRUCTION** – [Jason A Brant, MD](#)<sup>1</sup>, Elizabeth A Nicolli, MD<sup>2</sup>, John Lee, MD<sup>1</sup>, Douglas C Bigelow, MD<sup>1</sup>, Steven B Cannady, MD<sup>1</sup>; <sup>1</sup>Hospital of the University of Pennsylvania, <sup>2</sup>Medical College of South Carolina

# Poster Sessions

POSTERS WILL BE OPEN DURING ALL EXHIBIT HALL HOURS IN THE EXHIBIT ROOM.

**P112: TRIGEMINAL TEFLON GRANULOMA: A CASE REPORT WITH OPERATIVE NUANCES** – Nimer Adeeb, MD<sup>1</sup>, Salman Abbasi Fard, MD<sup>1</sup>, Mark A Liker, MD<sup>2</sup>, [Martin M Mortazavi, MD<sup>1</sup>](#); <sup>1</sup>California Neurosurgical Institute, <sup>2</sup>Department of Neurological Surgery, Keck School of Medicine, University of Southern California

**P113: BEYOND THE ENDONASAL ROUTE: COMBINED APPROACHES TO PITUITARY ADENOMAS** – [Jordina Rincon-Torroella, MD<sup>1</sup>](#), Monirah Albathi, MBBS<sup>2</sup>, Kofi D Boahene, MD<sup>2</sup>, Alfredo Quinones-Hinojosa, MD<sup>1</sup>; <sup>1</sup>Department of Neurosurgery, Johns Hopkins Hospital, <sup>2</sup>Department of Otolaryngology - Head and Neck Surgery, Johns Hopkins Hospital

**P114: SINGLE PIECE CRANIO-ORBITO-ZYGOMATIC APPROACH, TRANS KEY BURRHOLE ORBITAL ROOF OSTEOTOMY; A NEW MODIFICATION. SURGICAL TECHNIQUE AND REPORT OF EIGHT CASES** – [Mohamed A Mohamed Ismail, PhD](#); Ain Shams university Egypt. Saudi German Hospitals KSA

**P115: THE EPIDURAL PRETEMPORAL APPROACH; ANATOMY AND CASES IN AND OUT THE CAVERNOUS SINUS** – [Diego Mendez Rosito](#); Centro Médico Nacional 20 de Noviembre

**P116: THE INFRADENTATE APPROACH USING A MINIMALLY INVASIVE PORT TECHNIQUE** – [Ali O Jamshidi](#), Farid M El Hefnawi, MD, Andre Beer Furlan, MD, Daniel Prevedello, MD; The Ohio State University Medical Center

**P118: EXPANSILE ANTERIOR CRANIAL FOSSA INTRADIPLOIC EPIDERMOID CYST: AN ENDOSCOPIC ENDONASAL APPROACH TO RESECTION** - Joshua E Loewenstein, MD, Jason Blatt, MD, Brian Thorp, MD, [Deanna Sasaki-Adams, MD, MPH](#); University of North Carolina

**P119: INTRA-SPINOSUM MIDDLE MENINGEAL ARTERY LIGATION: A SIMPLE TECHNIQUE TO CONTROL BLEEDING IN THE MIDDLE FOSSA DURING THE ANTERIOR TRANSPETROSAL APPROACH** – [Shunsuke Shibao, MD<sup>1</sup>](#), Hamid Borghei-Razavi<sup>2</sup>, Kazunari Yoshida, MD, PhD<sup>1</sup>; <sup>1</sup>Department of Neurosurgery, Keio University School of Medicine, <sup>2</sup>Department of Neurosurgery, Clemens Hospital, Münster University

**P120: A COMPARISON OF CEREBELLAR RETRACTION PRESSURES IN POSTERIOR FOSSA SURGERY: EXTENDED RETROSIGMOID VERSUS TRADITIONAL RETROSIGMOID APPROACH** – [Brandon D Liebelt](#), Meng Huang, MD, Gavin W Britz, MD; Houston Methodist Neurological Institute

**P121: VESTIBULAR SCHWANNOMA AND PITUITARY ADENOMA IN THE SAME PATIENT: COINCIDENCE OR NOVEL CLINICAL ASSOCIATION?** – [Neil S Patel, MD<sup>1</sup>](#), Jeffrey T Jacob, MD<sup>2</sup>, Michael J Link, MD<sup>3</sup>, Colin L. W Driscoll, MD<sup>1</sup>, Matthew L Carlson, MD<sup>1</sup>; <sup>1</sup>Mayo Clinic - Department of Otorhinolaryngology, <sup>2</sup>Michigan Head and Spine Institute, <sup>3</sup>Mayo Clinic - Department of Neurological Surgery

**P122: RECONSTRUCTION OF TEMPORAL BONE ENCEPHALOCELES AND ASSOCIATED CEREBROSPINAL FLUID LEAKS: OPERATIVE TECHNIQUE, NUANCES, AND RESULTS IN 17 PATIENTS** – Ellina Hattar, BA, Yu-Lan Mary Ying, MD, Nicole Raia, ScD, CCCA, FAAA, Robert W Jyung, MD, [James K Liu, MD](#); Rutgers University- New Jersey Medical School

**P123: MALIGNANT PERIPHERAL NERVE SHEATH TUMORS OF THE 8TH CRANIAL NERVE ARISING WITHOUT PRIOR IRRADIATION** – [Matthew L Carlson, MD](#), Jeffrey T Jacob, MD, Elizabeth B Habermann, PhD, MPH, Amy E Wagie, MHA, Aditya Raghunathan, MD, Michael J Link, MD; Mayo Clinic

**P124: PETROUS APEX ARACHNOID CYST FENESTRATION VIA AN ENDOSCOPIC TRANSSPHENOIDAL APPROACH: A CASE REPORT AND REVIEW OF THE LITERATURE** – Cory D Bovenzi, BS<sup>1</sup>, [Enrique Perez, MD<sup>2</sup>](#), Travis R Ladner, BA<sup>3</sup>, Raj Shrivastava, MD<sup>2</sup>, Alfred M Illoreta, MD<sup>2</sup>; <sup>1</sup>Sidney Kimmel Medical College at Thomas Jefferson University, <sup>2</sup>Icahn School of Medicine at Mount Sinai, <sup>3</sup>Vanderbilt University School of Medicine

**P125: HEMORRHAGIC VESTIBULAR SCHWANNOMAS: A REVIEW OF 6 CASES** – [Christopher D Frisch, MD<sup>1</sup>](#), Matthew L Carlson, MD<sup>1</sup>, Colin L Driscoll, MD<sup>1</sup>, Jamie J Van Gompel, MD<sup>2</sup>, Michael J Link, MD<sup>2</sup>; <sup>1</sup>Mayo Clinic-Dept of Otolaryngology, Head & Neck Surgery, <sup>2</sup>Mayo Clinic-Dept of Neurologic Surgery

**P126: INITIAL SURGICAL OUTCOMES FOR A START UP ACOUSTIC NEUROMA CENTER.** – [Steven Giannotta, MD](#), Rick Friedman, MD, Dawn Fishback, PAC; Keck/USC

**P127: CHOLESTEATOMAS OF THE PETROUS APEX – REPORT OF 5 CASES AND THEIR MANAGEMENT** – [Anubhav G Amin, MD<sup>1</sup>](#), Christopher Linstrom, MD<sup>2</sup>, Lawrence Z Meiteles, MD<sup>2</sup>, Katrina R Stidham, MD<sup>2</sup>, Raj Murali, MD<sup>1</sup>; <sup>1</sup>Department of Neurosurgery, New York Medical College, Westchester Medical Center, <sup>2</sup>Department of Otolaryngology, New York Medical College, Westchester Medical Center and New York Eye and Ear Infirmary

**P128: MANAGEMENT OF SQUAMOUS CELL CARCINOMA IN THE EAR.** – [Atsunobu Tsunoda, PhD](#); Department of Otolaryngology, Juntendo University

**P129: THE ASSOCIATION OF VESTIBULAR SCHWANNOMAS AND PITUITARY ADENOMAS: A POPULATION BASED STUDY** – [Matthew L Carlson, MD](#), Neil S Patel, MD, Elizabeth B Habermann, PhD, Amy E Wagie, MHA, Michael J Link, MD; Mayo Clinic

# Poster Sessions

POSTERS WILL BE OPEN DURING ALL EXHIBIT HALL HOURS IN THE EXHIBIT ROOM.

**P130: SURGICAL SIMULATION OF ENDOSCOPIC ENDONASAL ANTERIOR SKULL BASE SURGERY USING 3D HEAD MODEL AND CONE BEAM CT.** – [Satoru Kodama, MD, PhD](#); Oita University

**P131: DUAL ENDOSCOPIC ENDONASAL TRANSPHENOIDAL AND PRECARUNCULAR TRANSORBITAL APPROACHES FOR CLIPPING OF THE CAVERNOUS CAROTID ARTERY- ENHANCED DEGREES OF FREEDOM: A CADAVERIC CEREBRAL PERFUSION SIMULATION** – Jeremy Ciporen, MD<sup>1</sup>, [Brandon Lucke-Wold](#)<sup>2</sup>, Justin Cetas, MD<sup>1</sup>, Aclan Dogan, MD<sup>1</sup>, William Cameron, PhD<sup>1</sup>; <sup>1</sup>Oregon Health and Science University, <sup>2</sup>West Virginia University

**P132: DEVELOPMENT OF A SKULL BASE CENTER IN A LOW-VOLUME ENVIRONMENT** – [Bostjan Lanisnik, MD, PhD](#)<sup>1</sup>, Janez Ravnik, MD, PhD<sup>1</sup>, Carl H Snyderman, MD, MBA<sup>2</sup>, Paul A Gardner, MD<sup>2</sup>; <sup>1</sup>University Medical Center Maribor, <sup>2</sup>Center for Cranial Base Surgery, University of Pittsburgh Medical Center

**P133: 3D SKULL RECONSTRUCTION WITH SELECTIVE LASER SINTERING FOR ENDOSCOPIC CRANIAL BASE SURGICAL SIMULATION AND TRAINING** - [Tristan M Tham, MD](#), Lauren Rahman, MHA, Gil Lotzky, Todd Goldstein, BS, Lee Smith, MD, Peter D Costantino, MD, FACS; New York Head & Neck Institute

**P134: DELAYED TENSION PNEUMOCEPHALUS SECONDARY TO A MISSILE INJURY REQUIRING SKULL BASE REPAIR.** – Tandon Adesh, MD, Gillick John, Wang Arthur, [Amin Anubhav, MD](#); New York Medical College

**P135: POST TRAUMATIC CSF RHINORRHOEA – ENDOSCOPIC APPROACH – OUR EXPERIENCE** – [Bagathsingh Karuppanan, MS](#), Nageshwaran Dhanuskodi, MS; MeenakshiMissionHospitalAndResearchCentre

**P136: OWN 23YY. EXPERIENCES WITH SKULL BASE TRAUMA** – [Jan Hemza, MD, PhD, PhD](#); Faculty Hospital at saint Ann, Brno

**P137: OUR EXPERIENCES WITH DISTAL VASCULAR ANEURYSMS** – [Jan Hema, MD, PhD, PhD](#); Faculty Hospital at saint Ann, Brno

**P138: CLINICAL FACTORS ASSOCIATED WITH VASOSPASM FOLLOWING PITUITARY APOPLEXY** – [Peter Morone, MD](#)<sup>1</sup>, Silky Chotai, MD<sup>1</sup>, Michael Dewan, MD<sup>1</sup>, Scott Zuckerman, MD<sup>1</sup>, J Mocco, MD, MS<sup>2</sup>; <sup>1</sup>Vanderbilt University Department of Neurological Surgery, <sup>2</sup>Mount Sinai Hospital Department of Neurological Surgery

**P139: RISK FACTORS FOR SHUNT DEPENDENCY AFTER ANEURYSMAL SUBARACHNOID HEMORRHAGE: A META-ANALYSIS INCLUDING 25 YEARS OF DATA** – [Sam Safavi-Abbasi, MD, PhD](#)<sup>1</sup>, Christopher D Wilson, BS<sup>2</sup>, Robert F Spetzler, MD<sup>1</sup>; <sup>1</sup>Barrow Neurological Institute, <sup>2</sup>University of Oklahoma

**P140: A CASE REPORT OF PITUITARY APOPLEXY WITH CONCOMITANT SUBARACHNOID HEMORRHAGE** – [Amjad N Anaizi, MD](#), Daniel R Felbaum, MD, Joshua Ryan, MD, Walter C Jean, MD; MedStar Georgetown University Hospital

North American Skull Base Society

# 27<sup>th</sup> Annual Meeting

February 17-19, 2017

*The Roosevelt New Orleans, New Orleans, Louisiana*

**Pre-Meeting Course:** February 15-16, 2017  
*LSU Health Lab, New Orleans, Louisiana*

PRESIDENT: Jacques J. Morcos, MD  
PROGRAM CHAIRS: Mustafa Baskaya, MD & Zoukaa Sargi, MD  
PRE-MEETING COURSE CHAIRS: Carlos David, MD & Daniel Nuss, MD

## CALL FOR ABSTRACTS

NASBS will be accepting online submissions for oral or poster presentations. Topics include:

- Anatomy of the Skull Base
- Biologic Behavior of Skull Base Tumors
- Complications
- Craniopharyngiomas
- Endoscopic Techniques
- Head and Neck Tumors
- Imaging Techniques
- Innovative Technologies
- Meningiomas
- Orbital Tumors
- Pediatric Skull Base
- Pituitary Tumors
- Quality of Life
- Radiosurgery
- Reconstruction
- Surgical Techniques
- Temporal Bone/Acoustic Tumors
- Training and Education
- Trauma
- Vascular Lesions

Abstract  
Submissions Open  
**SUMMER 2016**

Registration Opens  
**FALL 2016**
