Issue 1

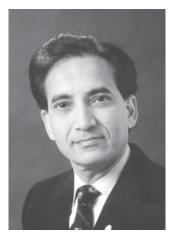

President's Message

Dear Fellow Member:

Volume 1

Let me extend my sincere appreciation for your confidence in electing me as your President this year to serve our organization. As we enter our 15th year, we have new challenges and exciting times ahead of us with a year full of activities.

The outstanding meeting in Memphis gave us significant insight into the strength and talent that lies in our membership. We plan to utilize this to its fullest extent to make next year's annual conference even more exciting, information and comprehensive in its breadth and depth. Amongst many of the challenges that we will face this year, and the plans that we have outlined for execution, I want to draw your attention to a few.

We have engaged a new management firm, Drohan Management Group, who will be responsible for the day-today conduct of the business and management of the society. The Drohan Group comes with an extensive experience in management of professional organizations and conferences and conventions and my working relationship with them to date is nothing but positive as to the high level of proficient services that they will provide in running our organization. Rest assured that we are in excellent hands and I anticipate a bumper year of educational, scientific, and fiscal success.

The Research Committee has been reactivated this year with the specific charge of initiating a collaborative clinical trial for patients with unresectable epithelial malignant neoplasms involving the anterior cranial fossa. Dr. Ehab Hanna, Chairman of the Research Committee, working with Dr. Sandeep Samant, is feverishly engaged in developing this protocol, which you will receive for your review during the course of the year. The Research Committee is also charged with the responsibility of reopening the national/international registry of skull base operations for malignant diseases which will further enhance the follow up on previously registered patients (exceeding 1500) and add new patients to provide a solid international data base. Statistical data emanating from this registry will provide benchmark results for comparison with any further clinical trials. This effort is steered by Dr. Snehal Patel of the Research Committee.

The Program Committee co-chaired by Drs. Dennis Kraus and Franco DeMonte, is planning an exciting program with new events including breakfast sessions, an international forum, and panels on controversial issues. This year we also contemplate having a continuous video session available throughout the course of the meeting for those who are interested in reviewing surgical techniques. A technology session presented by the industry will be a new feature at the annual meeting whereby you will have an opportunity to quickly update your market review of the latest technological developments in instrumentation.

The Pre-Conference <u>Practical Workshop</u> steered by. Dr. Saleem Abdul Rauf and Dr. Daniel Nuss will this year feature demonstration by "Masters" in addition to the opportunity for registrants to do individual cadaver dissections.

UPCOMING EVENTS

Annual Meeting February 14-17, 2004 **Astor Crowne Plaza New Orleans, LA**

Instructional Course February 11-13, 2004

President's Message

... continued from front cover

We have added two new features to the practical workshop this year. They are endoscopic and endoscope- assisted skull base surgery steered by Drs. Vinod Anand and Vijay Anand and reconstructive surgery of the skull base steered by Dr. Peter Costantino. Registrants to the practical course will have an opportunity to participate in all three courses. The program for nurses, physician assistants and allied personal will be dovetailed with the practical workshop and will allow an opportunity for our nurses and assistants to participate in the cadaver dissection exercises.

Our web site is being revised and reconstructed and will offer a medium to keep you continuously updated with the happenings in the Society. In addition to the web site, this newsletter edited by Dr. Anil Nanda is on your desk to bring you up to date with the ongoing activities of the Society and the proposed plans for the coming year. Above all, New Orleans in February is clearly at its best in the post-"Mardi Gras" time with outstanding cuisine, perfect weather, and typical Southern hospitality.

I am excited at the challenge of providing leadership to our illustrious organization and anticipate your support in achieving a bumper year.

With best wishes.

Sincerely yours,

atm Stel

Jatin P. Shah, M.D. President

Craniofacial Surgery for Malignant Skull Base Tumors: Report of an International Collaborative Study

Snehal G. Patel, MD

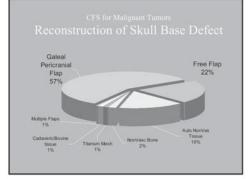

Craniofacial surgery (CFS) is performed for a variety of neoplasms, both benign and malignant. However, because of the relative rarity of these tumors, no single center treats enough

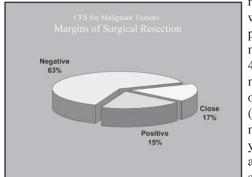

patients to accumulate significant numbers for meaningful analysis of outcomes. Therefore, an International Collaborative Study Group comprising 17 institutions was set up to report their

collective experience with the aim of assessing the safety and efficacy of CFS and to establish a benchmark for comparison of outcomes of other approaches and future treatment strategies. Data from the records of 1541patients were submitted by the 17

contributors. After exclusions for incomplete data, 1427 patients (1307 malignant and 120 benign tumors) were eligible for analysis. The overall report on CFS for malignant tumors was presented at the 14th

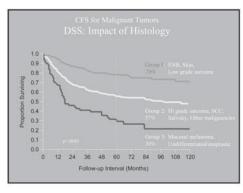

Annual Meeting of the NASBS in Memphis. The majority of tumors (87%) involved the anterior skull base, 10% involved the middle fossa while 3% involved both. Most patients (59%) had undergone some form of treatment prior to CFS. A third of the patients were recorded to have developed a postoperative complication after CFS. The commonest complications were

related to the local wound while the postoperative mortality rate was 4.3%. With a median follow-up of 25 months (range 1-940 months), the 5year overall (OS) and diseasespecific survival

(DSS) rates calculated using the Kaplan-Meier method were 54% and 60% respectively. The histology of the primary tumor, extent of intracranial extension and status of surgical margins were independently significant predictors of RFS and DSS. In addition, the presence of medical comorbidity predicted worse OS. Subset analyses of specific histologic types of tumors have also been performed. Results of analyses of patients with

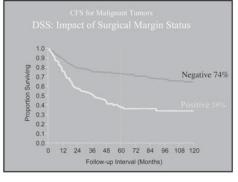

esthesioneuroblastoma (n=151), salivary tumors (n=121), sarcoma (n=146) and skin cancers (n=120) have been presented at the NASBS, the New York Head Neck Society and American Head Neck Society

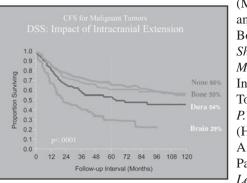

meetings. These manuscripts are currently under consideration for publication, and the initial manuscript describing the overall data has been submitted for review to Cancer. Over the next year, the NASBS plans to reopen the registry to previous participants for updating the database, and also to add new

patients from interested institutions.

Secretary's Message

The North American Skull Base Society newsletter has been resurrected from the ashes of the *Petrous Pulse*, and its new incarnation will be called the *North American Skull Base Society Newsletter*! We will try to make this a biannual feature with input from members, and updates regarding organizational activities including meetings, calls for abstracts, and other updates.

Firstly, I would like to salute Mr. Lawrence Leong for the tremendous job he has done for our organization over the last 13 years. He was dedicated and kind in his service as Executive Director of the NASBS, and we wish him all the best.

The Memphis conference was a resounding success, and immense credit is due to Dr. Jon Robertson for putting on a great meeting. The cadaver dissection facilities coordinated through Janice Halpern at MERI were superlative, as well. Currently an excellent program is being put together for our upcoming meeting in New Orleans, including practical workshops. The research committee is active, and a copy of the international research protocol is published in this newsletter. I urge you to visit our website as well and provide suggestions in terms of improvements and additions (http://www.nasbs.org).

In Memphis Dr. Brackman indicated during the general body meeting that as a neuro-otologist, he would like to see more talks/courses on issues such as brain protection. This is a multi-specialty organization, and intellectual cross-pollination is what keeps it going. In light of his suggestion, we would like to have a member survey to see what the organization is fulfilling and where our critical needs and weaknesses lie. This will bring together the collective thoughts of our constituents including head and neck surgeons, neuro-ophthalmologists, neurosurgeons, otolaryngologists, plastic surgeons, radiation therapists, and radiologists to better tailor our conferences and educational needs accordingly.

Lastly, we are also excited about the new management firm Drohan Management Group, who will coordinate our organization's needs. I feel that this will present exciting new opportunities for our organizational growth, and look forward to working with them. This is an exciting time for the NASBS, and we look forward to a fantastic meeting in New Orleans. As we say in Louisiana, "Laissez le bon temps rouler!"

Sincerely,

Anil Nanda MD, FACS Professor and Chairman Department of Neurosurgery LSU Health Sciences Center in Shreveport

Memphis Meeting Notes from the 14th Annual Meeting of NASBS

The 14th Annual Meeting of the North American Skull Base Society was held in Memphis this past February and was a grand success. The meeting started off with practical courses that were directed by Dr. Abdulrauf and Dr. Anand. There was a hands-on practical dissection course, as well as some clinical correlation talks. A new feature this year was a Nurses and Allied Health Course that was also very successful. The Medical Education Research Institute (MERI) has one of the best cadaver labs, and provided superb facilities including individual microscopes with simultaneous audiovisual display. The President's welcome reception was held at the Peabody Place Museum and Gallery, which featured a spectacular jade collection from China.

The scientific session started on Saturday, and there were some excellent panel discussions on controversies in the management of cavernous sinus meningiomas and optic nerve sheath meningiomas. Dr. Al Rhoton Jr., in his Galen-esque splendor, once again gave an illuminating anatomical talk on the skull base from front to back and below the brain. This was followed by concurrent paper sessions. Dr. Jeffrey Bruce then shared a very informative session on clinical applications on molecular biology for skull base tumors, and provided an exciting basic science session for the meeting. That evening

there was a wine and cheese tasting offered in the Exhibit Hall of the Peabody Hotel, with the famed Peabody ducks taking center stage initially.

On Sunday, Dr. John Popp spoke very lucidly on social economic issues, followed by Dr. Petruzzelli. Clearly one of the highlights of the meeting was the honored guest lecture by Dr. Paul Donald, where he spoke in an

Dr. Paul Donald Honored Guest Speaker

erudite fashion on the evolution of skull base surgery for malignancy. Dr. Donald is one of the founding presidents of this organization, and his presentation was superb. This was followed by several paper presentations and Dr. Yasargil's special invited lecture on microsurgical principals in skull base surgery. Sunday evening there was a rhythm and blues night on Beale

Dr. Jon Robertson NASBS Past President

Street, and for those interested in nothing but the Jailhouse Rock, there were tours of Graceland. On Tuesday, there were numerous other papers presented and an excellent session on acoustic neuromas, as well.

All in all, it was a superb intellectual meeting with a lot of interaction between the various specialties. Former NASBS President Dr. Jon Robertson

deserves kudos for putting on a superlative meeting, and for giving us the best in southern hospitality.

NASBS Organizes First Senior Resident Workshop

The first Senior Resident Neurosurgical Skull Base Educational Workshop was held in Memphis on August 21-24, 2003. This was organized under the leadership of Dr. Robertson, and is the first workshop that has been specifically aimed

towards senior residents. This extremely successful course was made possible by an unrestricted educational grant of \$75,000 from **MEDTRONIC**.

Thirty residents from across the country attended this course and found it to be an excellent educational experience. Dr. Rhoton's seminal lectures on anatomy were the foundation on which this course was built, and were followed by faculty members reviewing cadaver dissection and explaining individual approaches. This will be an annual tradition, and hopefully will be expanded to include otolaryngology residents as well.

NASBS President Dr. Jon Robertson, his wife, and Janice Halpern of MERI jamming on Beale Street.

Invitation To Exhibit at the 15TH Annual Meeting & Exhibition February 14-17, 2004

From The President

On behalf of the membership of the North American Skull Base Society, I would like to extend to you a personal invitation to New Orleans. The exciting city of New Orleans offers wonderful weather in February, outstanding cuisine, terrific entertainment in the French Quarter, and above all, unforgettable Southern hospitality. In addition, there will be an exciting, interesting, and informative scientific program, consisting of a practical course with cadaver dissection and demonstrations by experts followed by the regular scientific meeting with keynote addresses, panels, symposia, proferred papers, posters and video presentations. I look forward to seeing you next February.

With best wishes.

Jatin P. Shah, M.D. President

CALL FOR ABSTRACTS

INSTRUCTIONS

Deadline for receipt of abstracts for the February 11-17, 2004 Annual Meeting of the NASBS has been extended until **December 1, 2003**. List the presenting author's full name and complete mailing address (E-mail address is mandatory) as well as names of co-authors. All correspondence regarding the abstract will be sent only to the presenting author. Indicate author's presentation preference. The presenting author should also answer the Disclosure of Commercial Relations section questions. After the abstract is e-mailed, receipt by NASBS will be acknowledged within **24 hours**. The presenting author will be asked to proof-read and confirm the abstract title and author information. As soon as the Program Committee has selected the submitted abstracts for presentation, the presenting author will be notified by e-mail. Please note that all presenting authors must be registered for the Annual Meeting.

ABSTRACT CONTENT

- 1. The title should be in upper and lower case letters.
- Adequately describe the objectives of the study so that the quality of the work can be evaluated by the Program Committee. 2.
- 3. The abstract should contain four parts: (1) Introduction presenting the purpose of the study, (2) Methods describe the procedures and materials employed, (3) **Results** give a summary of the results and findings, and (4) **Conclusion** discusses the findings and how they relate to the stated purpose of the study and existing knowledge.
- 4. The abstract should not exceed 250 words in English.

PREPARE YOUR ABSTRACT

- 1. The only method of abstract submission is electronic (via E-mail). The abstract and all the information on the form may be e-mailed as an attachment (Word format, any version), or pasted into an e-mail message as generic text.
- 2. If you are submitting several abstracts, e-mail each abstract in a separate e-mail.
- 3. In the subject line of your e-mail, include the following: NASBS Abstract #1, NASBS Abstract #2 (for second abstract), etc.
- 4. Do not include charts or tables in your abstract.
- 5. If the abstract includes complicated symbols, it should be sent as an attachment.

E-MAIL THE ABSTRACT TO:

- 1. Info@nasbs.org
- 2. Acknowledgement of receipt will be e-mailed to the e-mail address submitting the abstract.
- 3. Inquire with the NASBS office if you do not receive an acknowledgement within 7 days of submission.

PRESENTATION PREFERENCE

Please indicate how you would like to present this abstract at the Annual Meeting:

- 1. Oral Presentation Only
- 2. Poster Presentation Only
- 3. Oral OR Poster Presentation (at discretion of Program Committee)

VIDEO PRESENTATIONS REQUESTED:

Videos of 10-15 min durations are encouraged for a video cinema in the exhibition hall. Authors are requested to provide high quality videos of directed surgical procedures, patient management issues including radiation based therapy and other technilogic and therapeutic advancements. The videos will be shown on a continuous basis with the presenter only needing to be available to answer inquiries on an informal basis.

DISCLOSURE OF COMMERCIAL RELATIONSHIPS

The North American Skull Base Society must insure balance, independence, objectivity, and scientific rigor in all its individually sponsored or jointly sponsored educational activities. All faculty participating in a sponsored activity are expected to disclose to the activity audience any significant financial interest or other relationship (1) with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services discussed in an educational presentation and (2) with any commercial supporters of the activity (significant financial interest or other relationship can include such things as grants or research support, employee, consultant, major stock holder, member of speakers bureau, etc). The intent of this disclosure is not to prevent a speaker with a significant financial or other relationship from making a presentation, but rather to provide listeners with information on which they can make their own judgments. It remains for the audience to determine whether the speaker's interests or relationships may influence the presentation with regard to exposition or conclusion.

Please submit answers to both Sections I. and II.

- a. Will your presentation include discussion of any commercial products or services?
- b. If Yes, do you have a significant financial interest or other relationship with the manufacturer(s) of any of the products or provider(s) of any of the services you intend to discuss? \Box Yes \Box No

If Yes, please list the manufacturer(s) or provider(s) and describe the nature of the relationship(s),

II. Will your presentation include discussion of any pharmaceutical products or medical devices that are considered investigational (not FDA approved use; "off label")? **U** Yes No 7

FORMAT FOR ELECTRONIC SUBMISSION OF ABSTRACT **Presenting Author:** Name & Degree: Address (Department): Address (Institution): Address (Street, Suite, Box): City, State, Postal Code, Country: Phone, FAX, E-mail: **Co-Authors:** Co-Author (Full name and degree only); Co-Author (Full name and degree only) Title: Title of abstract. Title:

Anterolateral Skull Base Tumors

Abstract:

Introduction: Neoplasms involving the anterolateral skull base are rare. We describe our experience at a major cancer referral center.

Methods and Materials: Records of patients since 1992, presenting with neoplasms involving the base of the skull bounded medially by sphenoid sinus, anteriorly by the sphenoid wings, and laterally by petrous internal carotid artery, were retrospectively reviewed.

Results: The median age of 28 patients was 47 years. Sarcomas were the most common tumors (46%). Squamous-cell carcinomas, chordomas and atypical/anaplastic meningiomas totaled 36%. Spread to the dura, brain or along perineural space occurred in 43%. Patients frequently required multiple surgeries (60%), chemotherapy (71%) and radiotherapy (61%). Median follow-up spanned 3.8 years. Median time to recurrence was 18.9 months with 36% of the patients being alive without cancer and 32% with cancer while 21% of patients had died from cancer. 2 patients were lost to follow-up and 1 patient died of pulmonary embolism. The 1-year and 5-year survivals were 88% and 63% respectively.

Conclusion: Anterolateral skull base tumor management is challenging. Tumor control and a useful survival benefit can be achieved in most patients.

Presentation Preference: Oral presentation only

Disclosure of Commercial Relationships: I. no II. no

Effective March 1, 2003, Drohan Management Group became the new headquarters for the North American Skull Base Society. DMG ranks in the top dozen of association multimanagement organizations and has a staff of over 30 employees, whose expertise will be available in carrying out various functions of our society.

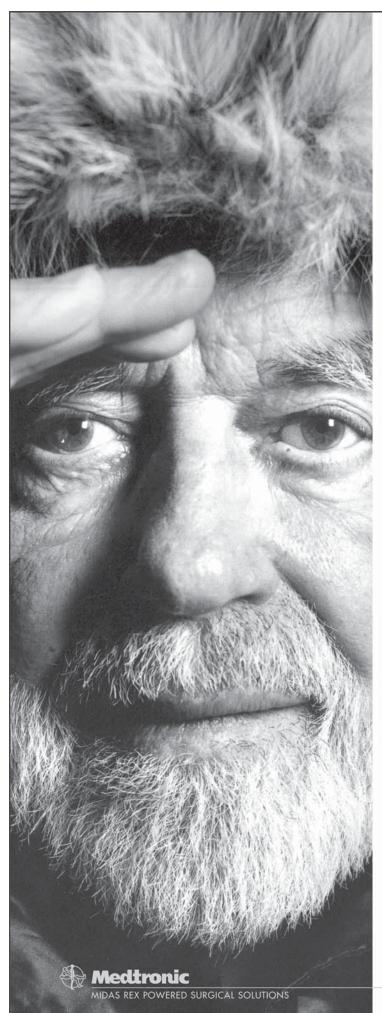

Kathy Hoskins will serve as the NASBS Executive Director. Kathy has worked in the association management industry for 12 years and has extensive experience with both scientific and medical societies. In this capacity, she has been involved in conference planning, marketing, membership development, board and committee communication, and support of several associations. She has been a senior account executive with DMG for seven years and serves as executive director of several societies.

Elisa Lucini is the administrator and Lori Ruhlin is the administrative assistant for NASBS. Elisa Lucini has been in the meeting planning industry for over four years. She has been with DMG and on Kathy Hoskin's team for one year. Lori Ruhlin is new to the DMG Team, as of April this year. She has an extensive customer service background, 5 years at the managerial level, along with over 3 years executive administrative experience. Please feel free to contact them with any questions regarding your membership.

The new NASBS address is 12100 Sunset Hills Road, Suite 130, Reston, VA 20190. *Please note the new phone number is* **703-234-4149 and fax number is 703-435-4390.**

Do we have your current mailing information?

Please make sure to contact NASBS at info@nasbs.org with your current mail, fax, and email information to ensure you receive all NASBS materials.

"Dream big and dare to fail. Do not give credence to the words no or can't. No matter how bold, dreams can be yours. Do not yield. Remain steadfast." - Colonel Norman Vaughan Member of the first American expedition to Antarctica in 1928

From 1928 to 1930, Norman Vaughan led the dog teams that carried Admiral Byrd across the Antarctica to land never before seen by man. In tribute, Admiral Byrd named a mountain after him. In 1995, following a lifelong dream, Vaughan climbed the 10,302 feet to reach the summit of Mt. Vaughan three days before his 89th birthday.

Legends - they dream bigger. They inspire those around them. And at the most crucial times, they perform at the highest level. Qualities you'll appreciate in the Medtronic Midas Rex Legend System, four new high-speed motors with a single line of interchangeable attachments and tools.
