

EDUCATION

Advanced Endoscopic Skull Base Surgery Course

This course is open to neurosurgeons, otolaryngologists-head and neck surgeons and other skull base surgeons who are interested in learning endoscopic endonasal surgery of the skull base, pituitary fossa, orbit and craniocervical junction.

Date: **April 16-18, 2026** | Location: **Columbus, OH**

Our Mission

The mission of the Advanced Endoscopic Skull Base Surgery Course is to equip participants of varying experience levels with advanced anatomical knowledge and surgical decision-making skills in endoscopic skull base surgery through a comprehensive blend of foundational lectures, interactive discussions and hands-on cadaveric training.

Course Highlights

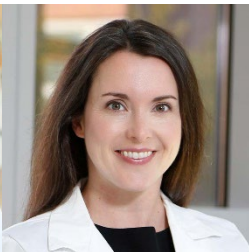

- Two-Part Program: Didactic lectures and hands-on lab
- Focus on anatomy, instrumentation, and surgical approaches
- Interactive Q&A sessions with faculty
